a. Input Data

Welcome to SpectraScope! 👋

SpectraScope is an app and python package for machine learning on spectral data.

Please Load Your Data

Select Data Option

- (•) default (pdf,xanes)
- ( ) default (wine)
- ( ) custom

`default (pdf,xanes) data loaded!`

Detected 2 loaded datasets

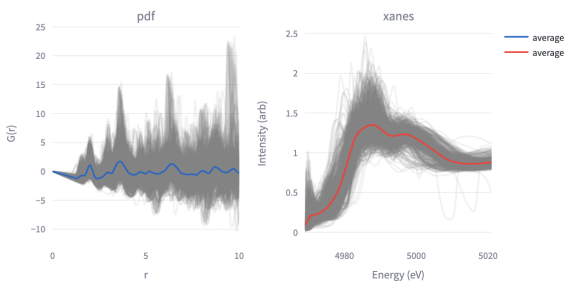

☐ Show pdf Data

☐ Show xanes Data

Name of prediction

nn

Raw Data

b. Visualize Featurizations

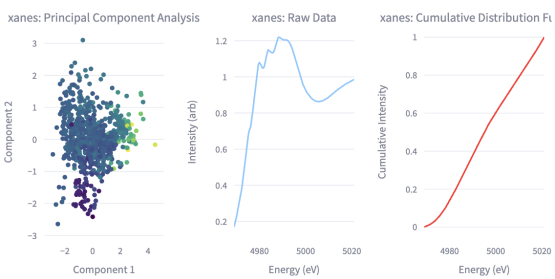

2. Choose Spectra to Featurize

Input column(s) to featurize

xanes ×

Visualize Features

Principal Compo… × Raw Data × Cumulative Distr… ×

c. Model Training

5. Run!

Random Seed

20

Test Set Size

0.25

☐ Scale X

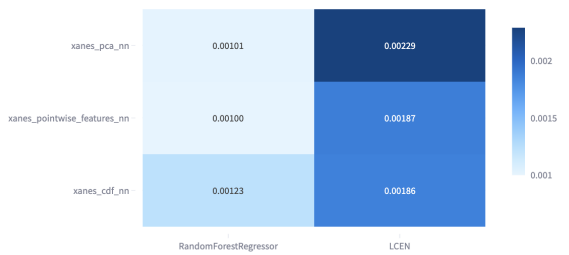

☑ Fit Random Forest

☑ Fit LCEN

Run it!

✅ Done!

Fitting Summary, MSE

d. Prediction & Inference

Visualizing Feature Selection and Importance

LCEN : vertical lines on selected features

Random Forests : Normalized feature importance for every feature

Select Model to Visualize

xanes_cdf_nn_RandomForestRegressor
